

Apache Maven

Beginner to Guru

Maven Wagon

Maven Wagon

- Maven Wagon is a unified Maven API
- Maven Wagon is a transport abstraction for artifact and repository handling code
- Allows for different providers to be used for communications with Maven Repositories
- Majority of the time HTTP / HTTPS is used, no configuration is needed.
- In some corporate environments you may need to configure Wagon for Proxy settings

Maven Wagon Providers

- Available Providers:
 - File
 - HTTP / HTTP Lightweight
 - FTP
 - SSH/SCP
 - WebDAV
 - SCM (In Progress)
