Apache Maven

Beginner to Guru

Challenge - Create Project Lombok Project

Create Project Lombok Project

- Project Lombok is a code generator which uses annotation processing to enhance classes

- You can generate getters, setters, toString, etc from annotations at compile time

- Challenge:

  - Create Maven Project with Lombok Dependency

  - Add One class User, with private string properties for first name, last name, and email

  - Add @Data, @NoArgsContructor, @AllArgsConstructor, and @Builder

  - Review generated source code
